

# Vegetable List 2024

**New for 2024**

## 1. BEANS

- a. **Blue Lake Bush** – 56 days. Excellent fresh, frozen or for canning. 12 to 22-in plants are widely adaptable with heavy yields.
- b. **Chick Pea** – 85 Days. Garbanzo beans are great for making homemade hummus. This unique heirloom variety produces delicious beans. Perfect for hummus and other Middle Eastern dishes. Also great for sprouting as well. Grow for a week and eat entire plant. Very nutritious! Contains vitamin A, C, calcium, iron and magnesium.
- c. **Garbanzo** - (Chick pea) Small beans add gobs of protein to salads, 5-15 pods/stem, white flowers, 112 days
- d. **Yellow Wax** – (Pencil Pod Black Wax) 52 days. Widely adapted. Stringless, curved, round pods, 5-1/2 to 6" long. Pods snap easily and make excellent fresh eating, or use as a canned bean. This black-seeded wax bean comes in early and produces for a long time.

## 2. BEETS

- a. **Detroit Dark Red** – 59 days. This classic variety produces early, very dark red and extremely sweet roots up to 3" across. They're good fresh, canned or frozen.
- b. **Candy Stripe** – 57 Days Red skin, showy red and white striped interior.
- c. **Rainbow Mix** – 55 days. This mix includes 5 colorful varieties. Harvest at baby size to eat raw or pickled, use mature roots for cooking. Stems and leaves are tasty in salads and steamed.

## 3. BROCCOLI

- a. **Destiny** – 89 days. This mid-early, compact, heat-tolerant broccoli variety features medium-small green heads, a smooth dome and a round shape. A flavorful source of Vitamins A and C. Destiny is improved over Premium Crop - when cut, Destiny will produce side shoots.
- b. **Durapak** – **NOT AVAILABLE 2024**
- c. **Pack Pro** – 55 Days. Large tight heads have side shoots, compact, semi dome, wonderful crunchy taste.
- d. **Premier** – 62 days. F1. Replaces Premium Crop. Smooth domed 9" head, fine texture, super crisp and tasty. Resists mildew, small head and heat tolerant, and compact.

## 4. BRUSSEL SPROUTS

- a. **Jade Cross** - 80 days **All American Selections Winner**. Withstands the heat, always sets a bumper crop of very firm, tightly wrapped, blue-green "sprouts" with a mild, sweet flavor. Vigorous plants are widely adapted.

## 5. CABBAGE

- a. **Copenhagen Market** –100 days. One of the largest early maturing roundhead varieties. The solid, round heads are six to eight inches in diameter and average three to four pounds in weight. Keeps well.
- b. **Danish Ballhead** –110 days. A standard storage-type variety, it has been a dependable variety, resisting bolting and splitting and keeping until late spring. Produces round, blue-green, seven-to-eight-inch diameter heads weighing five to seven pounds.
- c. **Golden Acre** - 58 days. Early, disease resistant variety bears solid, 3-4 lb. heads. Sweet, green leaves are refreshing in salads. Compact plants are great for small gardens.

- d. **Late Flat Dutch** – 105 days. Good storage variety and one of the best for kraut. Great for the home garden with flat/round, green heads reaching up to 30 lbs.
- e. **Ruby Perfection** - 85 days. The 3.5-lb. heads have great flavor and are slow to burst.
- f. **Savoy Ace** - 78 days. **All American Selections Winner.** This variety produces good yields of fine quality savoy type cabbage. The crops produces large 3 ½ lb deep green heads.
- g. **Stonehead** – 50 days. **All American Selections Winner.** Nearly round heads have excellent holding.
- h. **Sweet Slaw** – 65 Days. Sweet Slaw is a sweet, green cabbage with a smooth, dense, cone-shaped head perfect for slicing and shredding in sauerkraut and cole slaw. Resistant to cracking. Cabbage is frost tolerant - plant it in your early-spring or fall garden!

## 6. CARROTS

- a. **Rainbow Mix** -- 70 days. A brilliant mix of Scarlet Nantes, Dragon and Yellowstone. Ideal for fresh market, home gardens and to enthrall and inspire you and the little ones into eating your veggies and the rainbow! Enjoy these delicious carrots cooked or raw.
- b. **Little Finger** -- 65 days. An extra sweet, tiny Nantes type gourmet carrot only 4" long and 1" thick with smooth skin and small core. Perfect for serving whole and great for growing in containers. Tiny gourmet great for salads.

## 7. CAULIFLOWER

- a. **Deep Purple** – 80 Days. Brilliant purple heads are a great draw at farm stands and excellent for CSAs and restaurants. The colorful florets are attractive served raw with dip or as a cooked vegetable. Produces a true cauliflower head on large plants. Best for fall harvest, but can also be sown in spring.
- b. **Snow Crown** - 53 days One of the easiest cauliflowers to grow. Vigorous, rapid growth and long harvest. Snow white, 2 lb. heads are 7-8" across and very flavorful.

## 8. CELERY

- a. **Tango** – 80 Days. Highly adaptable variety with great flavor and tender stalks. Tango performs well under less-than-ideal growing conditions such as heat or moisture stress.

## 9. Celeriac

- a. **Ravena** – 106 Days. Hybrid celeriac with great flavor and texture. Very productive. Stores well. Great for Winter.

## 11. Collards

- a. **Top Bunch** – 50 Days. Earliest to harvest. Tall, productive plant produces medium-green, slightly savoyed leaves. Our most attractive variety for fresh market sales.

## 12. CORN

- a. **Incredible** - 83 days sweet, yellow kernels make for superb eating. One of the best varieties for freezing.
- b. **Peaches & Cream** - 83 days A popular home garden variety. 8" long ears filled to the tip with sweet, juicy white & yellow kernels.

## 13. CUCUMBER - SLICING

- a. **Burpless Supreme** – 55 days SLICING A sweet, *burpless* slicer with no bitterness. Dark green fruit grow up to 7.5" long with a high percentage of them being seedless.

- b. ***Bush Crop*** – 62 days. SLICING Bush-type habit for small gardens/containers. Produces an abundant crop of nice, straight, 6-8” long, cucumbers.
- c. ***Early Spring Burpless*** – 63 days SLICING, 12” fruit. **Bush-type** *Burpless* and bitter-free. White flesh is extra crisp and mild.
- d. ***Eureka*** – 57 days. PICKLING OR SLICING Dark green fruit on vigorous and highly disease resistant plants. Harvest for pickling at 3” lengths; good for slicing up to 5”.
- e. ***Fanfare*** – 62 days. SLICING **All American Selections Winner**. Fruits are slender, attractive, flavorful, and extremely uniform. The semi-dwarf plants produce high yields over a long harvest period. Good disease resistance.
- f. ***Homemade Pickles*** – 55 Days. *Homemade Pickles* is a trusted heirloom cucumber great for pickling at home. This variety is the most popular pickling cucumber raised by home gardeners and pickle lovers
- g. ***Marketmore*** – 66 days. SLICING The non-fading, dark green fruit is 9” long. Disease resistant.
- h. ***Patio Snacker*** - 50 days SLICING 8” long, dark green fruits with good flavor and a nice crunch. Short vining plant is well-branched and high-yielding. Great for large containers with a small trellis
- i. ***Pick A Bushel*** - 50 days. 2014 All-America Selections Regional Award Winner for Heartland and Great Lakes! A semi-bush variety that yields 10-20 white spined pickles per plant. Best harvested when 3-6" long *Pick-a-Bushel* is resistant to Cucumber Mosaic Virus, Scab, and MMV yielding bushels of bountiful harvest in any growing season.
- j. ***Straight Eight*** – 65 days. SLICING Tip-top slicing cuke is perfectly straight! Dark green, 8” fruits have a small seed cavity and crisp fine-grained flesh.
- k. ***Summer Top*** - 40 days. SLICING *Burpless*. 8 inch long, straight cucumbers with a refreshing, sweet taste. High yields. Heat tolerant. Mildew resistant.
- l. ***Sweet Slice*** - 63 days. SLICING *Burpless*. Sweet and bitter free. Dark green fruit is 10-12” long.
- m. ***Sweet Success*** – 54 days. SLICING **All American Selections Winner**. *Burpless*. Seedless variety produces high yields of sweet, burpless fruit. 12” long, straight cucumber. Disease resistant.

#### CUCUMBER – BITE-SIZE, SPECIALTY

- a. ***Mexican Sour Gherkin*** – 60 days. Also known as Cucamelon and Mouse Melon, this vining plant is loaded with 1 inch miniature watermelon-like fruits that are sweet and almost salty.

#### CUCUMBER – PICKLING

- a. ***Bush Pickle*** – 54 days. PICKLING Bush-type for small gardens or containers. Crisp and tender with a cool, mild flavor.
- b. ***Eureka*** – 57 days. PICKLING OR SLICING Dark green fruit on vigorous plants. Harvest for pickling at 5” lengths; good for slicing up to 7”.

#### 14. EGGPLANT

- a. ***Black Beauty*** – 80 days Broad, egg-shaped fruit with dark purple skin.
- b. ***Classic***- 76 days Teardrop, glossy, deep purple-black colored, 8-9 in. fruit are the size and shape well known in most markets.
- c. ***Fairy Tale*** – 50 days **All American Selections Winner** Elongated lavender fruit with white stripes is produced in clusters of 3 to 5. Sweet, bitter-free fruit is best harvested at the gourmet baby stage, about 4 x 1.75”.

- d. ***Ghostbuster*** – 80 days. Rated the #1 white eggplant. Sweeter flavor than purple skinned varieties. Deep oval shape, 6-7” in length. Pick early before they mature.
- e. ***Gretel AAS*** – 55 days. **All American Selections Winner** Earliest white eggplant produces clusters of glossy white mini-fruit, about 3-4 in. long. Petite, 3 ft. plants are great for containers.
- f. ***Hansel*** – **All American Selections Winner** True miniature ideal for containers. Finger-like clusters of 3-6 teardrop shaped, dark purple fruit. Harvest from 2 to 10 inches long.
- g. ***Ichiban II*** – 61 days. Long, slender, deep purple, almost black eggplants have a mild flavor, perfect for Oriental dishes or simply splitting and grilling or roasting. Plants are very productive.
- h. ***Little Fingers*** – 60 days. The Little Finger eggplants are slender, petite eggplants that are excellent for grilling and cooking. This eggplant has a dark purple skin is thin and tender with a silky flesh. This variety produces few seeds and a mildly sweet flavor. Harvest when the eggplant is young and glossy. Little Finger is a great variety for container growing and requires very little cooking time since it is so tender.
- i. ***Orient Express*** – 58 days. Slender glossy black Asian eggplant is 8 to 10 in. long with thin skin, mild flesh, and delicate flavor. It matures very quickly and sets fruit in a wide range of temperatures, which makes harvests last even longer. Enjoy this versatile eggplant grilled, roasted, or stir-fried.
- j. ***Patio Baby*** – 45 days. **All American Selections Winner.** Very early and compact making it a great choice for containers or in the garden. Deep purple, egg-shaped fruit should be harvested at baby size-2 to 3 inches, and are delicious roasted or in dips and salads. Thorn less allowing for painless harvesting, makes it child-friendly, too. Plants will continue to produce fruit throughout the entire season.
- k. ***Rosa Bianca*** – 75 days Prized by chefs and gardeners alike for its creamy, mild flesh and lovely appearance, this Italian heirloom eggplant has become very popular. Well-filled, round to teardrop-shaped fruit is white with soft lavender streaks outside, and inside flesh white and sweet with no trace of bitterness. Delicious for slicing, stuffing, or any eggplant use.
- l. ***Satin Moon***– 50 days. An improved version of Satin Beauty, this variety is a gorgeous purple-black, slightly fluted oval eggplant that is 6 to 8 inches long. Its firm, high-quality flesh is mild and flavorful and its shape lends itself to large, meaty slices for Italian eggplant dishes or cooking on the grill.

## 15. GOURDS

- a. ***Autumn Wings*** – 100 days. A blend of many colors of gourds with wings & warts, fruit shapes like spoons and swan/pears.
- b. ***Martin Bird house*** - 100 days. Cucurbita pepo. Open Pollinated. Produces good yields of tan-colored gourds. These gourds are excellent for making birdhouses. It has a flat oval bottom end and a tapered top. They are 16" tall and 12" across. Dries well and holds up outdoors if cured properly. Also known as Martinhouse Gourds. An excellent choice for home gardens and specialty market growers.

## 16. KALE

- a. ***Blue Scotch Vates***– 56 days. An early kale that produces tasty greens when used in salads or steamed. The blue-green leaves are finely curled and very attractive reaching 20" high. Extremely hardy and productive (may overwinter).
- b. ***Lacinato*** - 62 days. 10-18” tall. Strap-like leaves are 3” wide with a heavily saved texture. Excellent flavor that is enhanced by frost. Also known as Dinosaur or Tuscan Kale. Excellent for kale chips.

- c. **Premier** - 55 days. New! Deep green smooth leaf, scalloped edge, heavy crop, great flavor, good for salads/sandwiches or cooked, longstanding.
- d. **Red Russian** – 50 days Oak-shaped, gray-green, toothed leaves with deep-purple veins and stems. Very tender leaves turn dark green and have a sweet taste when cooked; also, good raw. Harvest baby greens at 25 days. **Heirloom**. Also known as 'Ragged Jack'. Very disease resistant.

## 17. KOHLRABI

- a. **Purple Splendor** – 50 days. Flat, globe-shaped and purple-skinned bulbs are 4 to 6 in. (10 to 15 cm) across and have crunchy white flesh. High yielding with excellent interior quality. Good for late-season harvests.
- b. **Vienna White** – 55 days. Has a mild turnip-cabbage flavor; leaves are eaten like kale and white-fleshed bulbs are eaten like broccoli.

## 18. LEEK

- a. **Large American Flag** – 120 days. Hardy 15-18” plants, blue-green leaves with long, thick, well-blanching white stalks. Good for fall and winter, grows very quickly. The standard variety for home gardens.

## 19. LETTUCE

- a. **Black Seeded Simpson** – Compact with light green, frilled leaves. Crisp interior. Popular home garden variety.
- b. **Burpee Gourmet Blend** – 45 days. Flavorful mix includes Grand Rapids, Royal Oak Leaf, Red Salad Bowl and Ruby. Fast-growing, performs best in cool weather.
- c. **Buttercrunch** – 65 days. **All American Selections Winner** Very tender 4 ½” rosettes.
- d. **Deer Tongue Red** **NOT AVAILABLE 2024** - Tongue-like red blushed leaves with a plant that is larger than green Deer Tongue. Forms nice head, great in cool weather. Amish Heirloom.
- e. **Great Lakes Head** - 85 days. **All American Selections Winner** Traditional flavor, heading crisp iceberg type.
- f. **Red Oak Leaf** - Burgundy oak leaf similar to Red Salad Bowl but with a more golden sheen. Forms a larger and more packed full-size lettuce than Red Salad Bowl and Oscarde.
- g. **Romaine Parris Island** - 65 days. This popular Romaine has upright growth to 10 inches with large thick medium green slightly ruffled leaves with creamy white centers. Tender, crisp and sweet flavored. It is slow to bolt.
- h. **Salad Bowl Mix** - 50 days. **All American Selections Winner**. This blend contains both light and dark green-leafed varieties, as well as some tangy reds!
- i. **Salad Bowl Red** – 50 days. Slow to bolt and tolerant to heat. This bronze, burgundy leaf lettuce is delicious and does not get bitter as it matures. Particularly popular for its baby leaves in 28 days.

## 20. MELON

- a. **Burpee Ambrosia** – 86 days Luscious, extra-sweet, juicy melons with unique distinctive flavor. Extremely thick, firm flesh is delicious down to the rind. Fruits are medium size, 6 x 6”, and average 4.5 – 5 lbs. each because the meat is so thick and the seed cavity is so small. Resistant to powdery mildew.
- b. **Burpee Hybrid** – 82 days Improved to resist powdery mildew, this outstanding variety is still the growers’ choice. High yields – excellent quality, not as “musky” tasting as the original.
- c. **Earli – Dew Honeydew** - 80 days. The Earli-dew Honeydew is an early maturing melon for northern gardeners that has exquisite flavor. It has smooth, green-gold skin

with lime-green flesh. Grows 2 1/4-3 pounds. We do not have a big supply of this scarce seed—so order early! Disease resistant.

## 21. ONION

- a. ***Ailsa Craig Exhibition*** - Yellow-skinned, round bulbs are of the Spanish onion type. Ailsa Craig has a distinct advantage over regular Spanish varieties in earliness and cool weather tolerance. Short-term storage into early winter.
- b. ***Borettana (Cipollini)*** – 60 days from transplant. These Italian heirlooms have a flattened, spherical shape about 2” in diameter and 1” thick. These ‘Cipollini’ have firm, fine-grained flesh, good flavor, and satiny skins. Excellent keeping quality.
- c. ***Candy*** – 85 days. Huge, very early bulbs with golden brown skin, white interior, mild flavor. Thick rings with mostly single centers.
- d. ***Copra*** – **NOT AVAILABLE 2024** 107 days. Great long-term storage quality. Round bulbs are uniform and medium-size with dark yellow skin and thin necks that dry quickly. Ivory flesh has high sugar content and moderate pungency. Onions stay rock hard for up to a year in storage without losing flavor. Especially suited for the North.
- e. ***Green Banner Bunching*** – 65-70 days. Uniform, vigorous variety is more heat tolerant than others – slow to bolt and holds well. Stems are glossy white, leaves are full and dark green, and the flavor is slightly pungent.
- f. ***Red Carpet*** - 116 days. Deep red onion produces 3-4” bulbs with attractive magenta interior rings. Tight bulbs store extremely well.
- g. ***Red Marble (Cipollini)*** 75 Days - Red Marble is small and flat with a deep red color both inside and out. This type of onion does particularly well in both intermediate- and long-day zones (i.e., USDA Zones 2–7); however, it’ll still produce smallish bulbs outside of this range. This onion will generally grow to approximately 2–4” in diameter, but if you want baby pearl onions, grow them closer together in cute little bunches to inhibit their size.
- h. **Walla-Walla – 125 days. Brown-skinned**, mild, sweet onions.
- i. ***White Sweet Spanish*** – 110 days Midseason variety, tops for the North. Mild, sweet flavor raw, sautéed or deep fried.
- j. ***Yellow Sweet Spanish*** – 110 days Flavor never fades. Golden globes weigh up to a pound and keep well for their size.

## 22. Pak Choi

- a. ***Toy Choi*** – 30 Days. Super quick to harvest and easy to prepare, these tiny bunches of crisp white stalks with tender green leaves are only 4-5" tall. Perfect for a single serving side dish-quickly sautéed or roasted. Also great for "stir-fry for two".

## 23. PEAS

- a. ***Sugar Snap*** - 70 days. 3" long sweet, edible pods bear over a long picking period and yields well in both hot and cold weather. Provide strong support for 6' vines. String less when pod is young.

## 24. PUMPKIN

- a. ***Atlantic Giant*** – 125 days. This variety has produced the world’s largest pumpkin, with weights in excess of 600 lbs. Suited primarily for exhibition, although the medium-orange flesh can be used for pies. Plants should be started in pots and transplanted to insure adequate growing season. Vines are very large and require a lot of space.

- b. **Howden** - 115 days. The original Jack O-Lantern pumpkins sold at markets and roadside farm stands. Plant produces big 15 lb bright orange Halloween pumpkins. Varying in size and shape, these pumpkins have strong handles for making Jack-O-Lanterns.
- c. **Magic Lantern** - 115 days. Classic, upright, dark orange pumpkins. Restricted vining makes it great for small spaces. Pumpkins average 16-24 lbs.
- d. **Small Sugar Pie** - 95 days The Sugar Pie Pumpkin has a wonderful pumpkin flavor with sweet and fine-grained texture. It is the best pumpkin for cooking.
- e. **Wee-B-Little** – 85 days. This is a true miniature pumpkin. Same shape as a typical Jack-O-Lantern but is scaled down to decorative size, weighing about 1 lb. Ripens to deep orange with smooth skin. Spineless stems for sturdy handles. Compact vines spread only 6-8'. Pumpkins average 8-16 oz.

## 25. RADISH

- b. **Cherry Belle** – 22 days. Small, round, bright scarlet variety with crisp flesh and a mild flavor.

## 26. SPINACH

- a. **3 Season Smoothie** – 25 days F1, Smooth dark green upright leaf, perfect for any season harvest, highly resistant to mildew and leaf spot, and wonderful fresh taste.
- b. **Bloomsdale** – 30 days. Medium-dark green leaves on upright plants make Bloomsdale easy to harvest. Heavily savoyed. Suited for early spring and fall plantings as it is fast growing. For full size and bunching. Great flavor.

## 27. SOYBEAN

- a. **Edamame Sweet** – 85 Days. Edamame soybeans' flavor is nutty, buttery and truly irresistible fresh from the garden and they pack top nutritional value. Cook them quickly, right in their pods for appetizers and snacks or use like fresh beans in any recipe. These widely adapted 2-foot-tall bush plants offer consistently high yields of large 3 to 3-1/2-inch green pods with 3 to 4 plump and tasty beans per pod.

## 28. SQUASH – SUMMER

- a. **Early Summer Crookneck** - 45 days. Smooth, bright yellow curved-neck fruits mature to orange-yellow. Meaty, flavorful interior.
- b. **Eight Ball** – 35 days. Shiny, 3-inch round zucchini squash that is loaded with a delicious nutty, buttery flavor. Makes a fantastic stuffer. Matures several days earlier than others. Vigorous bushes are easy to harvest. AAS
- c. **Gold Rush** – 52 days. This is an All America Selections winner! This golden zucchini has an eye-catching golden yellow color that makes it a favorite squash for market stands. The smooth, cylindrical, uniform fruit are borne on upright, open plants that are easy to pick. Gold Rush makes a fine addition to fresh market vegetable displays.
- d. **Pattypan Yellow Bush Scallop** – 50-70 days. Compact plants are ideal for the patio. 5" yellow, scalloped fruit has a creamy texture and is very flavorful.
- e. **Yellow Straight Neck** – 55 days. Uniform yellow fruit on semi-open, bushy plants. Excellent grilled or fried.
- f. **Zucchini – Dark Green** – 45-65 day. Early vigorous plants bear lots of straight and smooth, 6-8" long, dark green mottled fruits with firm, greenish-white flesh.

## 29. SQUASH – WINTER

- a. **Acorn - Tay Belle** 72 days. Develops an overall dark green to jet black color very early after pollination, permitting an early harvest. Fruit size is 6" x 5".

- b. **Blue Hubbard** – 110 days Fruit is 12” by 7”, weight 7-10 lbs. globular seed cavity with points on each end, light blue-gray in color. Rind is hard, thick warty with slight rib. Flesh orange, fine texture with a sweet flavor. A productive variety that has been popular for many years.
- c. **Bush Delicata** –95 days. 6 x 4”, white/green striped fruit has smooth flesh and a sweet nutty flavor. Semi-bush plants are ideal for small gardens. Has a strong powdery mildew resistance.
- d. **Buttercup** — 90 days. 6" x 3", 2 - 3 lbs. Bright Orange, with an excellent chestnut flavor. Bright colored rind. Semi-Bush plant produces abundantly.
- e. **Butternut** – *Waltham* – 95 days. **All American Selections Winner**. Cooks up sweet and tender. Smooth 9-10” fruits, filled with orange flesh. Huge yields.
- f. **Spaghetti** – *Vegetable Spaghetti* – 100 days Oblong, mid-size yellow fruits have a tasty interior that is a popular nutritious alternative for pasta. Harvested in late summer and fall, the fruit can be stored for several months in a cool, dry location.
- g. **Super Moon** – Delicious and Ornamental! Vigorous plants produce deep green leaves that vividly contrast the ghostly white, smooth, blemish-free fruits weighing 25-50 lbs, measuring 15-18" across. Sturdy stems. Expect 2-4 fruits per plant. Deep orange flesh is exceptional roasted or in soups. 90 days

### 30. STRAWBERRIES

- a. **Laramie** – Everbearing Beautiful, large, red fruit with firm, aromatic flesh. Winter hardy -- works best in colder areas of USA and Canada (not recommended for Alaska or the South.) Eat fresh, freeze, or make jam. Works well in hanging baskets.
- b. **Honeoye** – June Bearing. A hardy, consistent producer. This vigorous plant bears crops reliably, with good runner production. The strawberries are delicious fresh, frozen, or in jams and wines. Cold hardy. Ripens in June. Self-pollinating.

### 31. SWEET POTATOES

- c. **Centennials** - Sweet, tender "baby bakers" in just 90-100 days from setting out plants; or allow them to mature. Carrot color inside with copper to orange outside skin.
- d. **Georgia Jet** – A spectacular variety with extremely fast growth and high yields. 90-100 day maturity. Georgia Jets have deep orange inside color with moist flesh and incredible taste. The outside skin is dark red.
- e. **Vardaman** – A bush-type variety with golden-yellow skin that darkens after digging. The flesh is the deepest, brightest, inside color. Stores well. 100 days.

### 32. SWISS CHARD

- a. **Bright Lights** - Tangy colorful leaves and stems are an excellent cooked vegetable for summer and a tremendous source of vitamins. Tolerant of hot weather and extremely easy to grow. Colorful stalks are at their best harvested young for salads or used as summer spinach.

### 33. WATERMELON

- a. **Crimson Sweet** – 80 days. An award-winning round variety with sweet, dark red flesh. Very widely adaptable and disease resistant.
- b. **Fascination Seedless**–80 days. Seedless, 16 – 20 lb., blocky-oval shaped, dark green striped, flesh is deep red with great flavor. Strong yields.
- c. **Sugar Baby** – 75 days. Small “icebox” type with very sweet, fin-textured red flesh and few seeds. Round, dark green fruits are very early.
